Summary

SAP BPC consultant with CNPC / Beijing Richfit International on Sonatrach's SHONE project, supporting planning, consolidation and reporting. Four SAP certifications across S/4HANA, SAP Analytics Cloud and ABAP Cloud. Earlier, data analyst and ERP support specialist at Géant Electronics, where I built Power BI dashboards and the tool that repaired company-wide stock data. Since 2024 I have also led a remote team of four to six developers as a freelance backend developer.

Experience

SAP BPC Consultant

June 2026 to present

CNPC / Beijing Richfit International, for Sonatrach (SHONE project), Algeria

- Support planning, consolidation and reporting processes for Sonatrach on the SHONE project, across Sonatrach's operations in Algeria.
 - Apply Business Process Flow (BPF) configuration to structure and monitor the planning and consolidation processes.
 - Develop reporting deliverables in the EPM Add-in and Analysis for Office (AFO) for end users; build and maintain reports that support business decisions.
 - Completed specialised training in BW Query Design and Security Design within the SAP BPC/BW landscape.
-

Backend Developer and Dev Team Leader

Oct 2024 to present

Freelance / Dev Group Service, remote

- Led 3 to 5 backend software projects in Laravel, delivering client platforms and internal tools on schedule.
 - Supervised a remote team of 4 to 6 developers with Agile methods, running sprints and code reviews to meet delivery deadlines.
 - Managed databases and server-side logic for scalable web applications.
-

Data Analyst and ERP Support Specialist

Jan to Jun 2025

Géant Electronics, Algeria

- Diagnosed a stock-data corruption, caused by network delays, that affected nearly every article in Cegid PMI and blocked production. Analysed stock at depot and lot level against the full movement history and built an automated tool that detected and corrected the affected records, restoring accurate stock data company-wide.
- Built and maintained 4 to 6 Power BI dashboards used across departments, giving leadership real-time visibility of operational and financial metrics and replacing manual reporting.
- Worked with the commercial team on budgeting and revenue analysis, reconciling accounting entries and revenue data in the ERP to support financial reporting.
- Primary Cegid PMI support for 30 to 50 users, resolving navigation and configuration issues and reducing ticket resolution time.
- Improved an internal Python Flask platform for Cegid PMI configurations: nearly 30% faster processing and more data capacity.
- Led the Cegid PMI launch in the after-sales service department, bringing 10 to 20 staff on board and gathering functional requirements after testing.

Intern, Transit and Customs Office

Sep to Nov 2021

Transite Baghoura, Bordj Bou Arreridj, Algeria

– Assisted with logistics documentation and improved digital workflows.
